## Annotated Checklist of the Birds of Wisconsin Wisconsin Society for Ornithology

Kirtland's Warbler photo by Joel Trick

This checklist contains all of the valid species on the Wisconsin state list as of June 1, 2018. Nomenclature and sequence follow the 59th supplement of the Check-list of North American Birds published by the Classification Committee of the American Ornithologists' Union. Decisions regarding the inclusion of species on this list were made by the Records Committee of the Wisconsin Society for Ornithology.

A column describing a generalized abundance of species is given using the following classifications –

Accidental – Less than 1 record every 5 years.

Casual – At least one record every 1-5 years.

Rare – Found annually but with fewer than 8 records per year.

Regular – Better than 8 records per year.

A Review List column shows those species needing review by the Records Committee. These review species need to be documented. You are able to find the Rare Bird Online documentation form at this link:

<http://wsobirds.org/rare-bird-documentation>

A list of Hypothetical Species is found at the end of the checklist.
